## Rider Registration

On track software will be used to track transponders during practice sessions. This will then enable the registration team to note you as registered if your transponder has activated at the finish line.

**PLEASE ENSURE YOU HAVE YOUR TRANSPONDER ON YOUR BIKE FOR PRACTICE.**

If you are unable to attend practice/plate collection, please contact Michelle at [state.registrar@bmxq.org.au](mailto:state.registrar@bmxq.org.au) prior to practice and organise for collection of your race plate and registration.

## Race Results

Race results will be published on Ezeventing website for the event. Within the results page, for the event, you will find a tab called 'Event Reports'. Within this you can find moto order and final order. Moto orders will be uploaded prior to racing each day.

## Transponders for racing

Transponders will be used for racing and the rider is responsible for the attachment on their bike, as well as ensuring that the subscription is active for the event. If your subscription ends just after the close of the event please keep an eye on it or purchase a new subscription and activate it prior to racing, to ensure that you are not penalized if it runs out during a race.

Please ensure that your Sprocket does NOT have their club transponder on for this event.

Checking Station will be available in staging for riders to check their transponders throughout the event. Please ensure that you check your transponder.
